

Борис Борисович Кузнецов

В мае 2017 г. скончался сотрудник Центра «Биоинженерия» Борис Борисович Кузнецов. Он был руководителем группы молекулярной диагностики генно-инженерных модификаций и, позднее – выросшей из этой группы лаборатории молекулярной идентификации. Лаборатория занималась разработкой методов идентификации генетических мишеней, исследованиями в области таксономии и филогенетики прокариот на основе сравнительного анализа различных генетических маркеров, изучением процессов эволюции некоторых видов бактерий, а также биотехнологическими приложениями. Борис Борисович и его сотрудники принимали участие в международном проекте по секвенированию генома картофеля (статья в Nature, 2011), занимались проблемой идентификации ГМО.

Борис Борисович был также участником и одним из основателей ТВ-проекта «Диалоги о рыбалке», автором замечательных публикаций в рыболовной периодике. Его тексты отличались прекрасным стилем и мягким юмором. Вот некоторые примеры:
